Twenty-Sixth Issue

Prices and Wages in India

COMPILED IN THE OFFICE OF THE DIRECTOR-GENERAL OF
COMMERCIAL INTELLIGENCE

CALCUTTA
SUPERINTENDENT GOVERNMENT PRINTING, INDIA
1909

PREFACE

RETAIL prices are expressed in India generally in terms of the number of sers (one ser=2·057 lbs) per rupee and were so published in tables Nos. 1 to 13 up to the 24th (1907) issue of this Volume. For convenience of comparison with wholesale prices, retail prices have since been shewn in terms of rupees and decimals of a rupee per maund (82·286 lbs).

In the present issue two new tables Nos. 32 (15) and 32 (16) have been added to shew the average wages paid at a typical jute mill in Bengal and a typical rice mill in Burma.

The tables have been limited to the last twenty-five years, together with the base year 1873 or any later year in which prices were first quoted.

CONTENTS

PREFACE	Page i
Indian weights and measures with their British and metrical equivalents	vi
Note on Variations in prices of food-grains and salt	1—9

A candy of Wool	„	588 lbs	=	266·717 „	=	7 „
A candy of Wheat	„	756 lbs	=	342·922 „	=	9 „
A candy of Cotton	„	784 lbs	=	355·622 „	=	9½ „
A case of Kerosene oil	„	65 lbs	=	29·484 „	=	32 sers
A chest of Opium	„	140 lbs	=	63·504 „	=	1¾ maunds

NOTE ON VARIATIONS IN PRICES OF FOOD GRAINS AND SALT

REASON FOR FLUCTUATIONS IN PRICES IN EACH QUINQUENNIAL.

A general rise of prices took place about 1860. With the suppression of the Mutiny and the transfer of the administration to the Crown, there commenced a new era of commercial and industrial activity. The resources of the country were developed by the construction of roads and railways, the improvement of harbours, and the extension of irrigation. The cotton famine caused by the American War of Secession (1861—65) gave a great impetus to the cultivation of cotton in India, which, while the war lasted, brought large profits to the cultivator and the merchant. The influx of the precious metals which had begun about the time of the Mutiny was thus further stimulated, and from about the second year of the war a great rise of prices took place throughout the cotton-growing districts of Western and Central India, as also in a smaller degree in other parts of the country. Prices were also raised by the famine of 1861 in the Upper Doab of the province of Agra and the neighbouring districts of the Panjab and Rajputana and by the scarcity in Cutch.

On the collapse of the inflation caused by the American war, prices would have fallen but for the great famine of 1866 in Orissa, which extended into Bengal proper, Bihar, Madras, and the eastern part of the Central Provinces. Another notable famine—that of 1869—affected Western Rajputana and parts of Northern India, and the extension of scarcity, towards the west and south, produced a rise of prices in Bombay, the Central Provinces, and Hyderabad.

During 1871—75 prices were not seriously disturbed by any calamity except the scarcity in Bihar of 1874, and although large purchases of grain were then made by the Government and scarcity prevailed in the adjoining districts of the United Provinces, the disturbance of prices was not widely felt. The export trade in rice expanded greatly in 1872-73, and was on a large scale throughout the decade 1871—80. It showed greater contraction in 1874, the year of the Bihar famine, than in the Deccan famine three years later.

In this quinquennium occurred the great famine of 1877-78, which affected an enormous tract in Western and Southern India and extended with diminished intensity into the north, causing a general rise of prices of food-grains all over India. The export trade in wheat, which had begun in a small way after the opening of the Suez Canal in 1870, received a check in the years 1878—80.

Speaking generally, all crops except rice were good or abundant during these years, though there was scarcity in a portion of the Panjab in 1884 and distress in parts of Bengal and Madras in 1885. The rice crop was bad between 1883 and 1885 owing to drought and floods, but wheat was plentiful, and the average price for all grains was low.

It is difficult to find adequate reasons for the great rise in prices which took place during these five years, for the 1889 famine in Ganjam (accompanied by distress in Orissa and scarcity in Bihar) was only of local importance, and prices had already reached their highest point in 1888. The export trade in food-grains was not larger than in the preceding quinquennium.

The high prices ruling during 1886—90 were still further raised in 1891-92 by prolonged drought, causing scarcity and distress in Madras, Bombay, the Deccan, Bihar, and Upper Burma. A strong Indian demand for rice was coupled with large exports, and at the same time there was an unprecedented exportation of wheat owing to the failure of crops in Europe, so that Indian prices rose almost to famine levels. With better seasons prices fell, but the lowest point reached in 1891—95 was still above the average level of the previous quinquennium; and, as in that period, the importation of silver for coinage continued on a large scale until the closure of the mints in June 1893.

The year 1896-97 was one of intense and widespread famine. The climatic conditions in the autumn were generally most unfavourable, and it was certain by the end of November that famine must supervene over a great extent of the country. It was most severe in the North-West Provinces and Oudh, and in the Central Provinces, where the calamity was seriously aggravated by the fact that in these territories there had been two previous years of short harvest. The winter rains, however, did good to the greater part of Madras, Bengal, Western India, and Rajputana, and also the greater part of the Panjab. The prices of food had been higher than usual in Northern and Central India before the failure of the autumn rains; but they had been moderate in Bengal, Madras, and Bombay up to September 1896. In September 1896 prices rose suddenly and in October famine prices were reached in Northern and Central India, though in Bengal, Madras, and Bombay the highest level was not reached till some months later.

For the years from 1897-98 onwards the chief reasons for the fluctuations in the prices of the principal food-grains are given in the tabular statement below :

1897-98

	Rice	Wheat	Jawar	Oilseeds	Cotton	Other crop (Indigo)
Area . (acres)	70,783,749	19,046,164	23,806,449	12,566,648	8,914,996	1,366,513
Export . (cwts)	26,746,661	2,392,607	642,560	12,553,080	3,722,526	133,840
General conditions prevailing in India	Generally good monsoon. Area slightly in excess of average and yield largely exceeds average.	Season favourable in Northern India but not so in Central and Western India. Area below average but yield above average.	..	Excellent yield of rape, mustard and linseed specially in the Panjab.	Generally favourable in Bombay and Madras. Area slightly below but yield about average.	..
Bengal . . .	Very good season and yield in excess of a full average crop.	Favourable season and satisfactory yield.	..	Good crop, though restricted area.	Season on the whole favourable.	Decreased area. Crop damaged by absence of seasonable rain or excessive rain.
Assam . . .	Harvest was a good one owing to sufficient rainfall.	Yield poor. Crop suffered from floods caused by earthquake.
N.-W. P. & Oudh .	..	On the whole favourable season and yield up to average.	..	Good crop, though restricted area.	On the whole conditions and quality of crop good.	Unfavourable season. Crop damaged by flood.
Panjab	Favourable season and yield normal.	..	Good crop . .	Decreased area but yield above average.	Generally good crop.
Bombay	Season not very favourable for sowing, but yield fairly satisfactory.	..	Area decreased. Outturn deficient. Good rapeseed crop.	Yield materially smaller than average.	..
Central Provinces .	..	Rain insufficient for early sowings but good for late crop. Yield on the whole fair.	Millet gave a bumper outturn.	Area decreased. Outturn deficient. Good rapeseed crop.	Season on the whole favourable; yield above average.	..
Madras . . .	Sufficiently good season; fair yield.	..	Prices of millet rose high, 40 per cent above previous year's.	Outturn greatly below average.	Crop injured by blight or drought; yield below average.	Decreased area but crop fair.
Burma . . .	Uniformly favourable season. Yield above average.
Berar . . .	Rice was cheaper than in 1896-97.	Season unfavourable.	Millet, gave excellent result. Price fell satisfactorily.	Season exceptionally favourable. Area increased. Yield above average.	Cotton gave more than double the yield of previous year.	..

1898-99

Area . (acres)	74,778,045	20,225,111	21,765,899	12,167,001	9,178,060	1,013,627
Export . (cwts)	37,012,286	19,520,496	1,960,590	19,279,909	5,411,012	135,187
General conditions prevailing in India	Generally good except in Berar. Area larger than average. Yield 26 per cent above the average.	Generally unfavourable except in Bengal and the United Provinces where season was very favourable. Area slightly smaller but yield slightly above average.	..	Yield above average; excellent in Bengal but poor in other provinces.	Generally unfavourable except in the North-Western Provinces and Bombay. Area slightly below but yield slightly above average.	Decreased area. Yield poor owing to excessive rain and floods.
Bengal . . .	Seasonable weather though slightly damaged by floods in Bihar. Yield largest on record.	Season uniformly favourable; outturn above normal.	..	Season generally favourable.	Season unfavourable; yield three-fourths of normal.	Season favourable in North Bihar but unfavourable in Lower Bengal.
Assam . . .	Both early and late rice turned out well, the latter being a bumper crop.	Decreased area. Yield very small.
N.-W. P. & Oudh .	..	Season on the whole very favourable; outturn good.	..	Season on the whole favourable. Good linseed and rapeseed but bad sesamum crop.	Season on the whole favourable; crop good.	Season not favourable.
Panjab	Conditions on the whole not favourable and yield below average.	..	Season very unfavourable for rapeseed. Poor yield of sesamum.	Season on the whole unfavourable; yield below average.	Season on the whole unfavourable.
Bombay	Season not on the whole favourable and yield below average.	..	Season on the whole unfavourable. Good yield of sesamum.	Season on the whole good. Yield abundant.	..
Central Provinces .	..	Season unfavourable and yield two-thirds of normal.	..	Season very unfavourable.	Season unfavourable. Yield below normal.	..

1898-99—continued

	Rice	Wheat	Jawar	Oilseeds	Cotton	Other crop (Indigo)
Madras . . .	Deficient early rains but later rain beneficial. Yield about a normal crop.	Poor sesamum crop	Season unfavourable. Decreased area and yield poor.	Season on the whole unfavourable
Burma . . .	Crop slightly injured by failure of late rains. Yield 90 per cent of an average crop.
Berar	Season not unfavourable at sowing time. But cessation of monsoon and the failure of winter rains damaged the crop.	Millet, the staple, food gave a good crop.	..	Cotton yielded very well.	..

1899-1900

Area . (acres)	72,808,952	16,104,770	21,604,821	10,327,641	8,375,841	1,046,434
Export . (cwts)	32,271,393	9,704,037	534,687	15,774,939	4,373,470	111,420
General conditions prevailing in India.	Generally bad, except in Burma where crop was exceptionally good. Area more than average but yield about the same.	Generally bad, owing to dryness of the season except in the North-Western Provinces and the Panjab. Both area and yield much below average.	..	Generally bad, except for sesamum in the Central Provinces and Bengal. Both area and yield below average.	Generally bad, specially in Bombay. Both area and yield much below average.	Generally bad. Both area and yield below average.
Bengal . . .	Season on the whole unfavourable.	On the whole season not favourable. Yield 5 per cent below normal.	..	Season unfavourable. Yield of sesamum above average.	Season unfavourable. Yield poor.	Season on the whole unfavourable. Crop also injured by flood.
Assam . . .	Outturn of early rice was not good in the Brahmaputra Valley, but late rice yielded a bumper crop.	Yield was somewhat below average.
N.-W. P. & Oudh .	..	Season on the whole favourable. Yield per acre highest on record.	Small millets were a full normal crop and other millets 87 per cent of average.	Season on the whole unfavourable. Yield of sesamum good.	Season unfavourable. Partial failure of crop.	Season on the whole unfavourable.
Panjab	Season on the whole favourable. Yield fair.	..	Season unfavourable. Yield poor.	Season on the whole unfavourable. Yield poor.	Crop damaged by absence of rain and stoppage of canal irrigation.
Bombay	Season very unfavourable. Failure of crop.	..	Season very unfavourable. Failure of crop.	Season very unfavourable. Yield very poor.	..
Central Provinces .	Hardly any crop came into ear.	Season unfavourable. Yield poor.	The millet crop was almost everywhere lost.	Season very unfavourable. Yield poor; sesamum good.	Season very unfavourable.	..
Madras ¹ . . .	Season on the whole not favourable. Yield not good, being two-thirds of a normal crop.	Season unfavourable. Yield not good.	Season on the whole unfavourable and yield poor.	Season generally unfavourable. Yield poor.
Burma . . .	Season good. Crop quite excellent, largely exceeding average.	Season not favourable. Area decreased.	..
Berar	Practically there was no wheat harvest.	Millets failed, giving 32 lbs. per acre against 274 lbs. in 1898-99. The stock sank from 6½ to 1¼ millions of maunds.	Yield practically nil	Cotton 30 lbs. per acre against 178 lbs. in 1899.	..

1900-01

Area . (acres)	60,026,273	20,103,024	22,019,290	12,913,372	9,609,820	977,349
Export . (cwts)	31,342,788	50,021	124,039	10,907,947	3,575,703	102,491
General conditions prevailing in India.	Favourable except in Bengal. - Both area and yield below average.	Unfavourable owing to excessive rain and rust in Northern and Central India and to want of moisture in Western India; area below average but yield above average.	..	Generally unfavourable except for rapeseed in the Panjab and Bombay. Area and yield below average for linseed, but above average for rapeseed and sesamum.	Generally unfavourable except in the N.-W.P. and Berar. Both area and yield below average.	Generally fair. Both area and yield below average.
Bengal . . .	Season not favourable	Season unfavourable. Yield poor.	..	Season unfavourable. Yield below average.	On the whole season unfavourable. Yield a little below normal.	Season on the whole good in Bihar, but unfavourable in Lower Bengal. Yield below normal.

EXPLANATORY NOTE—continued

1900-01—continued

	Rice	Wheat	Jauar	Oilseeds	Cotton	Other crop (Indigo)
Assam	Outturn of early rice was not good and late rice yielded distinctly poor crop.	Season not favourable
N.W. P. & Oudh	Rice was not a success, especially in the eastern districts. Yield 75 per cent of normal.	Season not very favourable. Yield above average.	Large millets were almost full crops.	Season not favourable for linseed and rapeseed but fair for sesamum.	Season favourable. Yield good.	Season fair. Yield below normal.
Panjab	..	Season not very favourable. Yield above average.	..	Season very unfavourable for rapeseed and sesamum.	Season fair; yield below normal.	Season favourable. Yield slightly below normal.
Bombay	..	Season on the whole unfavourable. Yield less than half the average.	..	Season generally favourable for rapeseed and sesamum, but unfavourable for linseed; the sesamum crop being 30 per cent more than average.	Season not very favourable. Yield below average.	..
Central Provinces and Berar	Outturn generally up to average	Season not favourable. Yield three-fourths of average.	Millets gave a fair yield everywhere.	Season generally unfavourable; linseed crop was poor.	Season unfavourable, except on rich soils in Berar where a heavy crop was obtained.	..
Madras	Season not unfavourable. Crop satisfactory.	Conditions not good. Crop deficient.	Season not very favourable. Yield below normal.	Season on the whole fair. Yield below average.
Burma	Conditions normal	Season not favourable. Yield three-fourths of normal.	..

1901-02

Area (acres)	70,067,328	18,600,958	21,818,880	11,967,839	10,298,750	782,170
Export (cwts.)	34,028,839	7,321,818	301,555	22,965,227	6,700,014	89,750
General conditions prevailing in India.	Favourable except for the winter crop in Bengal. Both area and yield much below average.	On the whole unfavourable owing to drought. Both area and yield below average.	..	Generally unfavourable. Area and yield below average.	On the whole fair. Area about equal to average, and yield slightly below average.	Unfavourable. Both area and yield much below normal.
Bengal	Season unfavourable for winter crop which was 75 per cent of normal; fair for autumn crop.	Season unfavourable. Yield much below normal.	..	Season unfavourable. Yield below normal.	Season on the whole unfavourable. Yield below normal.	Season on the whole unfavourable. Yield below normal.
Assam	Outturn was fairly good in the Surma Valley, Darrang, Nowgong and Lakhimpur, moderate in Kamrup, and poor elsewhere.	Season favourable. Area increased. Yield equal to average.
United Provinces	Crop only 65 per cent of normal.	Season unfavourable. Yield below normal.	..	Season unfavourable except for rapeseed whose yield was above average.	Season favourable. Yield above average.	Season unfavourable. Yield much below average.
Panjab	..	Season unfavourable. Yield much below normal.	..	Season unfavourable. Crop below average.	Season fair. Yield above average.	Season not favourable. Yield much below normal.
Bombay	Rice was lost over a large area in Gujarat.	Season generally unfavourable. Yield very poor.	..	Season generally unfavourable. Yield very poor.	Season not favourable. Yield much below average.	..
Central Provinces and Berar	..	Season unfavourable. Yield below normal.	..	Season unfavourable. Yield much below normal.	Season unfavourable except in Berar.	..
Madras	Season on the whole favourable. Area about average. Yield above average.	..	Millets generally yielded a crop below normal	Season unfavourable. Yield below normal.	Season fair. Yield two-thirds of normal.	Season generally unfavourable. Yield much below average.
Burma	Conditions favourable. Crop generally in excess of average.	Season not favourable. Yield two-thirds of normal.	..

1902-03

Area (acres)	71,632,546	19,615,282	23,125,019	13,035,565	11,104,298	653,801
Export (cwts.)	47,455,002	10,232,150	753,406	22,194,060	6,014,806	65,377
General conditions prevailing in India.	Not unfavourable. Both area and yield above average.	Season favourable, though of an abnormal character. Outturn shows great improvement, about 25 per cent more than average.	..	Season generally favourable. Area sown is 10 per cent above average but yield is only 6 per cent more.	Noticeable feature is the extension of area but the promise of an exceptionally favourable season not fully realised. Yield is 28 per cent above average.	Season unfavourable. Both area and yield nearly half the average.

1902-03—continued

	Rice	Wheat	Jawar	Onseeds	Cotton	Other crop (Indigo)
Bengal . . .	Season not unfavourable. The winter rice crop was 94 per cent and autumn 87 per cent of an average crop.	Season unfavourable. Yield little below average.	..	Season not favourable.	Season unfavourable owing to deficient rainfall.	Season unfavourable for indigo, and outturn worst on record, being 50 per cent of average.
Assam . . .	Outturn of early rice was good but late rice yielded a distinctly poor crop.	Season unfavourable. Area increased. Yield about average.
United Provinces . .	Rice gave an outturn of 80 per cent of normal.	Rainfall favourable in early season but dry season later on. Yield highest on record being 97 per cent.	Milletts gave an outturn of 85 to 95 per cent of normal.	Autumn rains seasonable and subsequent dry season very favourable. Area largest on record and outturn nearly double the average.	Cultivation extended owing to a succession of seasons of light rainfall. Yield 75 per cent of normal.	Late monsoon and continuous rains in July retarded the growth of indigo plant. Yield 68 per cent below average.
Panjab	Conditions favourable at beginning and end of season. Prolonged drought in middle injured crops on dry lands.	..	Prolonged monsoon favourable but failure of winter rains injured crop. Area and yield better than average.	Deficient rainfall, contracted area and early break in the rains marred prospects.	Insufficient irrigation, unfavourable weather and contracted area. Yield 54 per cent below average.
Bombay	Season was above the average. Monsoon late and winter rains beneficial. Yield very good.	..	Season favourable. Area greatly extended and yield 88 per cent above average.	Sowing rains much later than usual but season distinctly favourable.	..
Central Provinces and Berar.	Yield only 40 per cent of normal.	Early break in monsoon, contracted area but some good cold weather showers improved prospects. A bumper crop, 115 per cent of normal. In Berar the contracted area was owing to failure of late rains and yield about 70 to 75 per cent of normal.	Jawar gave normal yield. In Berar exception ally good showers raised the yield up to average.	Favourable conditions. Average crop. In Berar reduced area was attributed to failure of late rains and yield was reduced by wet during harvest, being 61 per cent of a normal crop.	Sowings successful on a large area. Heavy rains damaged crop later. But season was about the average. Yield 91 per cent of normal. In Berar both area and outturn much in excess of average, though monsoon was late and late rains heavy.	..
Madras . . .	Increased area owing to favourable season. Crop generally good, something like 86 per cent of a normal crop.	Seasonable rainfall, crop fair, and outturn 72 per cent of normal.	Good and timely rainfall stimulated sowings.	Cultivation declined owing to low prices. Yield 85 per cent of normal produce.
Burma . . .	Season not quite favourable. Yield 94 per cent of a normal crop.	Outturn was good, 93 per cent of normal.	..

1903-04

Area (acres)	60,596,654	23,612,730	21,048,067	14,545,066	11,895,597	712,049
Export (cwt's)	45,001,751	25,911,312	2,050,786	24,681,424	7,931,075	60,410
General conditions prevailing in India.	On the whole fair. Both area and yield about equal to average.	Season exceptionally favourable. Good crop of last year exceeded by 20 per cent both in area and yield.	..	Generally favourable and exceptionally good for sesamum.	Opening season favourable but prospects deteriorated by late and heavy rains. Area is 27 and yield 46 per cent more than average.	Generally favourable.
Bengal . . .	Deficient rainfall in early part of season affected area. The winter rice crop 90 per cent and autumn rice 80 per cent of normal.	Season generally favourable. Crop 90 per cent of normal.	..	Season favourable	Defective rainfall; at the outset favourable but late rains excessive and production low.	Conditions favourable with good late rains. Yield 65 per cent of normal.
Assam . . .	Rainfall very favourable to the winter rice crop which yielded a bumper outturn.	Scantiness of winter rains occasioned a short outturn of mustard.	Crop suffered from drought in March and April; the weather afterwards proved generally favourable.	..
United Provinces	Rice yielded 80 per cent of normal.	Heavy rain at close of the monsoon. But season remarkably favourable. Yield 75 to 80 per cent of normal.	Milletts yielded 80 per cent of normal.	Extended sowing, owing to excessive moisture, and light rain benefited crops.	Late arrival of monsoon restricted area and late excessive rain damaged crop.	Late arrival of monsoon injured crop. Yield was satisfactory in the Deob.
Panjab	Season favourable. Area largest on record. Yield 55 per cent above average—a bumper crop.	..	Favourable conditions at sowing time but failure of winter rains seriously affected crop in the south. Elsewhere a bumper crop.	Late spring rains favourable but late excessive rain affected the yield which was still above normal.	Timely irrigation and seasonable rainfall benefited crop.
Bombay	Favourable rains at sowing time. Season fairly good.	..	Linseed crop fairly good. Deficient late rains affected area and yield of rapeseed.	Favourable rains extended sowing and crop fairly well giving satisfactory yield.	..

1903-04—continued

	Rice	Wheat	Jawar	Oilseeds	Cotton	Other crop (Indigo)
Central Provinces and Berar.	The rice tracts cropped a splendid harvest owing to heavy rainfall.	Absence of winter rains affected crop which was still 93 per cent of normal.	Jawar was failure	Sowings though late were successful over large area; but absence of winter rains told seriously upon the crop.	Heavy and continuous rainfall retarded sowing and damaged crop. Yield 84 per cent of a full crop. In Berar favourable season and good prices encouraged sowings but heavy rain caused damage. Yield 63 per cent of normal.	..
Madras . . .	Good and timely rainfall. Crop fair. 87 per cent of normal.	Rainfall seasonable. Condition of crop fair.	Extended area owing to good and timely rainfall. Crop good, 85 per cent of normal.	Timely rainfall improved cultivation.
Burma . . .	Prospects very favourable and quality of grain excellent. Yield largest on record, 91 per cent of normal.	Early rains scanty and later rains excessive. Yield 88 per cent of normal.	..

1904-05

Area . (acres)	73,525,388	23,509,802	23,080,900	13,518,768	13,017,092	510,289
Export . (cwt)	40,486,372	43,000,502	2,526,544	26,873,744	5,657,743	49,252
General conditions prevailing in India.	Not very favourable. Both area and yield about equal to average.	Unfavourable owing to severe frost, but both area and yield above average.	..	Unfavourable owing to frosts followed by cloudy weather.	Generally favourable except in Bombay and Madras. Both area and yield above average.	Unfavourable. Both area and yield below average. Outturn 46 per cent only.
Bengal . . .	Rainfall unseasonable. Heavy rain in Bihar and flood in Eastern Bengal. Yield 80 to 86 per cent of normal.	Season unfavourable	..	Season unfavourable. Crop damaged by hail, frost and excessive rain.	Season unfavourable	Excessive rain damaged crop in Bihar. Outturn 56 per cent of normal.
Assam . . .	The various rice crops yielded good outturns in many places—well above normal.	Season not unfavourable. Area decreased. Crop fair.	Season generally favourable. Yield better than preceding year.	..
United Provinces .	..	Early conditions promising but later season disastrous owing to frost and rust. Yield 70 per cent of normal.	Millets gave outturns varying between 80 to 85 per cent of normal.	Conditions promising but crop suffered from frosts and insects.	Favourable monsoon at sowing time.	Sowings greatly contracted and excessive rain damaged crop.
Punjab	Condition of rainfall ideal, though severe frosts injured crop, yield was more than 116 per cent.	..	Season favourable, but severe frosts were disastrous to the crop.	Sufficient rainfall extended cultivation. Yield up to average or above it. An exceptional crop.	Insufficient canal irrigation interfered with sowings.
Bombay	Insufficient sowing rains. Severe frost injured crop.	..	The crop suffered from cold and frost in Gujarat and deficient moisture in the Deccan.	Shortness of early sowing rains contracted area. Crop suffered from deficient moisture and excessive cold.	..
Central Provinces and Berar.	The rice crop of Chhattisgarh including 71 per cent of rice area gave little short of an average yield.	Rainfall favourable but spring crop injured by frost in northern districts. Crop yielded well elsewhere.	..	Unusually inclement season, frost, cloudy weather and hail-storms damaged crops seriously.	Sowing season favourable to cultivation of the Southern districts. Cotton area extended.	..
Madras . . .	Restricted area owing to failure of rains. Crop suffered from want of moisture. Yield 75 per cent of normal.	Area decreased for want of timely and sufficient rainfall. Crop generally fair.	Timely rainfall for sowings but crop suffered for want of later rains.	Scanty rains and fall in prices greatly reduced area under indigo.
Burma . . .	Sowing rains seasonable and area extended, crop suffered in places from floods and high winds. Outturn 91 per cent of normal.	Late heavy rains damaged crop.	..

1905-06

Area . (acres)	73,400,528	22,402,307	20,742,047	12,501,253	13,009,359	401,124
Export . (cwt)	43,010,014	19,750,467	1,670,670	17,575,886	7,392,534	31,186
General conditions prevailing in India.	Generally fair except in Eastern Bengal. Both area and yield about average.	Season generally favourable and yield 13 per cent in excess of the preceding year.	..	Conditions unfavourable.	Season unfavourable.	The character of the rainfall at one time deficient, and at another in great excess, contributed to bad result.

1905-06—continued

	Rice	Wheat	Jawar	Oilseeds	Cotton	Other crop (Indigo)
Bengal . . .	Rainfall ill-distributed. Heavy rains and floods damaged crops in Eastern Bengal and Bihar. Winter rice 85 per cent of average crop.	Continuous late rains and hailstorms caused damage.	..	The crop suffered from want of moisture and untimely rains. Yield good.	Season favourable for early crops but late crops damaged by excessive rains and floods.	Season unfavourable. Excessive rains damaged crops. Yield 35 per cent of normal.
Eastern Bengal and Assam.	The late rice crops suffered in Eastern Bengal from floods. Harvest bad.	Ill-distributed rainfall.	..	Conditions on the whole not favourable.	Crop was injured by excessive rain.	..
United Provinces .	Early rice yielded 80 per cent of normal.	Restricted area owing to drought. Irrigated crop did well; yield 85 per cent.	Millets yielded from 65 to 75 per cent.	Insufficient moisture and absence of early winter rains affected crops.	Conditions favourable at sowing time. Dry crop failed.	Hot winds and want of rains affected crops in the Doab.
Panjab	Condition most favourable. A bumper crop.	..	Sowing season favourable. Prolonged drought checked progress but late rains improved prospects.	Season disastrous to the crop;—greenfly, severe drought and ravages of boll-worms.	Timely canal supply stimulated sowings.
Bombay	Deficiency in late rains restricted area. Season favourable in Sind.	..	Deficient late rains restricted area and linseed crop suffered from want of moisture. The rapeseed crop was good.	Early sowing rains favourable but late rains scanty. Crop yielded badly, being injured by boll-worms.	..
Central Provinces and Berar.	The rice crop was seriously deficient.	Heavy rains in September encouraged sowings. Harvest not much below normal.	Jawar did badly in Berar and Wardha. Outturn only a little over 60 per cent of normal.	Sowing season favourable but early cessation of monsoon restricted area and crop damaged by frost and absence of seasonable rains.	Season favourable though late, but prospects affected by ill distributed rains; yield below average.	..
Madras . . .	Rainfall timely. Crop fair to good.	Rainfall seasonable. Condition of crop fair to good.	Crop suffered from want of rains.	Area contracted for want of timely rains.
Burma . . .	Considerable area destroyed by floods but conditions satisfactory.	Season favourable and crop good.	..

1906-07

Area . (acres)	73,541,128	25,137,982	20,781,722	13,965,315	13,771,214	448,694
Export . (cwt)	38,709,105	16,028,914	780,182	10,735,690	7,400,839	35,102
General conditions prevailing in India.	Generally fair except in Western Bengal. Both area and yield below average.	Outturn 11 per cent greater than average.	..	Season fairly satisfactory, though sowing season unfavourable. Outturn good.	Season generally favourable, but crop suffered from disease and insects. Yield fair.	..
Bengal . . .	Sowings late owing to dry season. Disastrous floods in Bihar.	Season unfavourable. Cloudy weather, rain, and hail affected crop.	..	Season not very favourable.	Season favourable for early crops but late crops suffered from excessive rains and floods.	Sowings retarded for want of rain. The crops suffered later from floods.
Eastern Bengal and Assam.	Season favourable for winter rice.	Outturn of mustard 83 per cent and of linseed 78 per cent of normal.
United Provinces .	..	Crop promised well till February but later season very unfavourable. Cloudy weather and rust.	..	Insufficient moisture and late arrival of winter rains interfered with the sowings but the crop good in Bundelkhand.	Season very favourable and yield better than in several years past.	Season favourable though crop suffered at places from hot winds.
Panjab	Early promise of crop excellent, but excessive rains, hailstorms, and hot winds damaged crop.	..	Opportune autumn rains and satisfactory winter falls but excessive late rains damaged unirrigated crops.	Reduced area sown. Early season threatened with boll-worms but conditions favourable later.	Conditions normal.
Bombay	Crop fared well at first, but cloudy weather and rains induced rust and injured crop.	..	The crop suffered from want of moisture in the Deccan.	Early rains favourable. Crop suffered from want of rains in the Deccan.	..
Central Provinces and Berar.	..	Season favourable, and yield good.	..	Conditions favourable but damaged the crops by heavy rains. Outturn above normal.	Season generally favourable in northern districts but elsewhere crop suffered from excessive rains and floods.	..
Madras . . .	Rainfall seasonable and crop fair to good.	Conditions fair to good. Seasonable rainfall.	Rainfall was seasonable at sowing time.	Seasonable rainfall and rise in prices induced extended cultivation.
Burma . . .	Rains late and below average. Late rains beneficial. Yield 90 per cent of normal.	Season fairly favourable.	..

1907-08

	Rice	Wheat	Jawar	Oilseeds	Cotton	Other crop (Indigo)
Area (acres)	75,989,678	18,424,235	21,933,822	12,435,883	13,909,420	405,905
Export (cwt.)	34,259,314	17,600,183	1,125,993	23,184,519	5,562,024	32,400
General conditions prevailing in India	Season generally favourable except in Bengal.	Season unfavourable. Outturn 25 per cent below average.	..	Conditions unfavourable.	Season very unfavourable owing to shortage and bad distribution of rains.	Lack of timely rains affected the crop except in Bihar.
Bengal	Rainfall unseasonable and ill-distributed. Heavy floods in Orissa, Chota Nagpur, South-Bihar and South-West Bengal.	Crop suffered from continued drought.	..	Season unfavourable. Yield below normal.	Crop suffered from floods in August and later from drought.	Crop was injured by drought except in Bihar.
Eastern Bengal and Assam	Season favourable generally.	Unusual and extreme drought affected the crop from the beginning.	..	Monsoon closed early. Winter and spring months were unusually dry. Yield of mustard 74 per cent and of linseed 67 per cent of normal.	Conditions very favourable.	..
United Provinces	..	Crop fared well at first, but later strong westerly winds greatly damaged the crop which was sown late or insufficiently irrigated.	..	Prolonged drought severely affected the crops. Outturn of both linseed and rapeseed 50 per cent and of sesamum (til) 25 per cent of normal.	Rain was favourable till August when it stopped and dry west winds began to blow and dried up the crop in most places. Yield poor.	Affected by drought in the eastern districts.
Punjab	..	Climatic conditions most unsatisfactory.	..	Seasonal conditions unfavourable throughout.	Conditions not favourable. Injury by rats and insects.	Season unfavourable throughout
Bombay	..	Late rains deficient and yield below average.	..	Crops suffered from want of moisture and failed in places. Damage by frosts, disease and insects.	Early sowing rains deficient in places. Crop fair.	..
Central Provinces and Berar	..	Restricted area owing to the sudden cessation of monsoon. Yield below normal.	..	Insufficiency of moisture cloudy weather, frosts, insects, and absence of dew caused considerable damage.	Season not favourable. Yield much below normal.	..
Madras	Crop fair to good	Crop generally in fair to good condition.	Rainfall seasonable. Crop generally fair.	Area contracted owing to want of seasonable rainfall.
Burma	Outturn 93 per cent of normal.	Deficient rainfall. Crop poor.	..

1908-09

Area (acres)*	52,426,800	21,423,000	..	11,600,000	12,238,000	263,200
Export (cwt.)	50,251,470	2,192,145	459,460	16,242,695	6,708,411	21,946
General conditions prevailing in India.	Season not very favourable on the whole.	Season not very favourable owing to want of moisture during the period of growth.	..	Seasonal conditions fairly favourable on the whole except in Bengal and Eastern Bengal and Assam.	Season relatively satisfactory.	Moisture deficient everywhere except in United Provinces where season was in the main favourable.
Bengal	Rain deficient in Bihar. In Lower Bengal, Orissa and Chota Nagpur heavy rain and insect pests somewhat damaged the crop. Winter rice 72 per cent of the normal.	Crop suffered from deficiency of moisture.	..	Season very unfavourable for spring oilseeds and not very favourable for sesamum.	The season was generally favourable for the early crop but less favourable for the late crop.	Moisture deficient at first, but condition better afterwards.
Eastern Bengal and Assam	Season favourable on the whole	From the beginning the crop was affected by severe drought.	..	Long-continued drought affected spring oilseeds.	Season at first favourable but crop later on suffered through excessive rain in places.	..
		Moisture was insufficient in many places. Winter rains were not sufficient. Heavy rainfall of April and strong winds caused some damage.	..	Season fairly favourable. Outturn of linseed 75 per cent and of rapeseed and sesamum 80 per cent of normal.	Season fairly favourable.	Area decreased owing to insufficient water-supply. Except in places where the crop suffered from excessive late rain the season was favourable.
		Excessive rain at sowing time and at harvest time but too little during the period of growth.	..	Conditions fairly favourable though rainfall excessive in many districts.	Outturn low on account of the superabundance of monsoon rainfall and flood.	Late flowing of the inundation canals reduced area.
		Rain at sowing deficient. Pests damaged crop in places.	..	Condition of rapeseed and sesamum fair. Linseed suffered from absence of moisture and want of sufficient cold and dew.	Sowing rains deficient. Adverse easterly winds, cold and frost affected the crop.	..

* The figures are estimates and refer to provinces where the crops in question are extensively cultivated

1908-09

	Rice	Wheat	Jawar	Oilseeds	Cotton	Other crop (Indigo)
Central Provinces and Berar.	..	Conditions at sowing time favourable. Winter rains fairly well distributed; but crop somewhat affected by frost, cloudy weather and hail.	..	Seasonal conditions fairly favourable.	Favourable, though heavy and continuous rainfall in July and August restricted area.	..
Madras	Water-supply insufficient, but condition of crop fair to good.	Condition of crop fair.	Area decreased for want of timely and sufficient rainfall. Condition of crop fair to good.	Area restricted owing to want of timely rain. Outturn 68 per cent of the normal.
Burma	Season good. Crop 98 per cent of normal.	Season latterly favourable. Crop fair.	..

Generally speaking, the fluctuations in the retail prices of salt are the direct consequence of changes in the duty levied by Government. From 1861 to 1878 there was no change in most provinces. In 1878 the duty was reduced from Rs 4-0 a maund in Bengal to Rs 2-14-0, and the duty on Rajputana salt from Rs 3-0-0 to Rs 2-8-0. This change reduced the retail prices of salt in Bengal, the North-West Provinces, the Panjab and Assam; but about the same time the duty levied on salt in Sind was raised from Rs 0-8-0 to Rs 2-8-0 and in Bombay from Rs 1-13-0 to Rs 2-8-0, so that prices rose very largely in Sind and considerably in Bombay. Since 1878 the retail prices of salt all over India except Burma have uniformly responded to changes in duty. In 1882 the rate of duty was reduced generally to Rs 2 per maund which was raised again to Rs 2-8-0 in 1888. The reductions to Rs 2 again in 1903 and to Rs 1-8-0 in 1905 had an immediate effect in bringing down retail prices. The salt tax was reduced with effect from the 20th March 1907 for the third year in succession to Rs 1 a maund throughout the whole of India. Retail prices again fell in correspondence and the average in some provinces is now below Rs 2 per maund. In Burma the salt revenue system is somewhat different. In the years 1888, 1889 and 1890 increases in the rates of composition duty were made with a view to raising the incidence of the tax to the same level as in India, and the prices rose considerably in those three years. Since 1890 there has been little change in the retail prices.

PART I

NOTE ON RETAIL PRICES OF FOOD-GRAINS AND SALT

Prior to 1873 prices of food-grains were officially recorded in different provinces, but the statistics were not collected on any uniform plan, nor brought together in an accessible form.

Records of prices

Under orders of the Government of India issued in 1872 a fortnightly return of retail prices in sers per rupee for the commoner food-grains and salt in each district was instituted, and these returns have been regularly published in the *Supplement* to the Gazette of India since 1873. In 1878 a small volume was published, giving yearly average prices of food-grains for the period 1861—1876 in certain districts which were selected as typical. In 1884 the figures in the earlier volumes were revised, prices for the period 1876—1883 were added, and a new volume was published. Since that date a statement of the average prices for each year beginning from 1861 has been published annually in the volume entitled “Prices and Wages in India.” Throughout the period from 1872 additions to the record have been made from time to time by increasing the number of stations from which reports regarding certain grains were required, and also by adding “Kangni” to the list. These tables are now limited to the last twenty-five years with the base year 1873.

Tables Nos. 1—11 shew the annual average prices of each of the ten commoner kinds of food-grains and of salt. The prices quoted are the averages of the half-monthly prices reported during the year. The districts in each province are grouped together with reference to their climatic character and rainfall, and averages are struck for each group as well as for each province.

Table No. 12 shews the annual average prices of the most important food-grains at twenty-three stations, which have been selected with a view to giving a fair indication of the general level of prices throughout each province.

Table No. 13 shews the variations of these prices, the prices of the year 1873 being taken as 100. The year 1873 marks the beginning of the great change in the relative values of gold and silver and the character of the seasons was in this year generally normal.

PART II

NOTE

WHOLESALE PRICES OF STAPLE ARTICLES OF TRADE AND CONSUMPTION

The tables in this part of the volume contain figures of the wholesale prices of some of the principal staples of the imports and exports, the wholesale prices of food-grains and other articles in Indian markets, and the price paid by the Supply and Transport Corps for articles for the consumption of troops in India.

Table No. 14—Staple articles of Imports—The articles in this table, though few in number, represent in their aggregate value a large share of the total import trade. On the average of the last three years the imports of cotton-goods (yarn and manufactures), of metals, and sugar represent about 53 per cent of the whole imports into India. In consequence of the development of the Indian coal-fields, foreign coal is no longer a considerable item in the import trade; and the rapid increase in the imports of kerosene oil, which began in about 1888, has been checked by the competition of oil produced in Burma.

The quotations are taken for Calcutta from the Price Current and Market Report of the Bengal Chamber of Commerce. The price of coal at Bombay is taken from the Bombay Market Report, and of gold from the Calcutta Price Current and Money Market Report, and the prices of sugar—Mauritius, and silk are reported monthly by the Commissioner of Customs, Bombay. The average price of bar silver in London as quoted daily by the Bank of Bengal is also given in this table.

The prices quoted are those for the first week of January and July in each year, or where quotations are not available for these weeks, for the nearest period.

Table No. 15—This table shows the variations in the prices quoted in table No. 14, taking the prices of the year 1873 as 100. In case of articles for which the record of prices began in a year later than 1873, the price of the first year for which quotations are given is taken as 100.

Table No. 16—Staple articles of Exports—The prices in this table are taken from the following sources:—

Calcutta:—The Price Current and Money Market Report of the Bengal Chamber of Commerce.

Bombay:—Current quotations of the Chamber of Commerce, Bombay Market Report and Trade Journal published in connection with the *Times of India*, the Current quotations of the Millowners' Association for the price of yarn and T. cloth, and a Monthly Report from the Commissioner of Customs for the price of wheat.

Karachi:—Price Current and Market Report of the Karachi Chamber of Commerce.

Madras:—Price Current and Market Report of the Madras Chamber of Commerce.

Rangoon:—Monthly Report from the Chief Collector of Customs.

The price of opium is obtained from the Finance Department.

The number of articles in this table is very much larger than the number of articles in the import table, and their aggregate value represents about 85 per cent of the total value of exports from India in the last three years.

The prices quoted are those for the first week of January and July in each year, with a few exceptions which are mentioned in foot-notes below the tables.

Table No. 17—This states the variations of the prices in table No. 16, the price of 1873 (in most cases the price in March) being taken as 100. In case of articles added to the list after 1873, the price of the first year for which quotations are given is taken as 100.

Tables Nos. 18 and 19—Comparison of the average prices in India and London of staple trade commodities and variations in the prices—Table No. 18 was prepared with figures from 1870 for the consideration of the Royal Commission appointed in 1886 to enquire into the changes in the relative values of gold and silver. It was published for the first time in the volume of Prices and Wages in India in 1890. It has now been limited to the last twenty-five years with the base year 1873.

The London prices are the annual averages of weekly quotations given in the *Economist*.

The Indian prices quoted are all Calcutta prices except those of cotton and rice. They represent the average of weekly quotations given in the Calcutta Price Current, which is published by the Bengal Chamber of Commerce. The price of cotton is taken from the Current quotations of the Bombay Chamber of Commerce. The price quoted for Rangoon (Ngatsain and Ngakyoun) rice is the average of the prices reported in a special monthly return which is received from the Chief Collector of Customs, Rangoon. In 1898 prices of Burma rice were substituted for those of Bengal rice.

Tables Nos. 20 to 22—Average prices in London of sixteen principal staples of trade and of bar silver and variations—Table No. 20 was prepared in 1885 for the Royal Commission mentioned above. It was reproduced in the volume of Prices and Wages in India in 1890, with the addition of two descriptions of cotton, namely, (1) Cotton, raw, Dhollera, mid, fair, and (2) cotton, upland, mid, fair. It has also been limited to the last twenty-five years with the base year 1873.

The prices in table No. 20 are the annual averages of prices reported in the monthly Trade Supplement to the *Economist*.

In 1899 the following additions and alterations were made:—

1. Coffee (Ceylon) was changed to coffee (East India plantation)
2. Indigo (Bengal), Jute Linseed (Bombay), Rapeseed (Calcutta) Rice (Bengal), Silk (Surdah), Cotton—raw (Dhollera), and Shellac were omitted—as London prices for all these articles, except shellac are shown in table No. 18.

3. Coals—Helton Wallsend, Beef—inferior, and Bar Silver were added.

4. A new table (table No. 21) shewing variations in the prices in table No. 20 was added.

The following changes in the tables were made in 1900 :—

1. Iron—Scotch pig, flour, leather, and butter were added.

2. Another new table (No. 22) shewing variations in the prices measured in silver was added.

The system on which table No. 22 is compiled is fully explained in a foot-note printed below the table.

Table No. 23—Annual wholesale prices of food-grains and other articles—Since 1897 wholesale prices of food-grains and certain other articles have been reported for selected marts in each province of India under orders issued by the Government of India in 1896. The following is a list of the articles for which fortnightly wholesale prices are reported, and the provinces from which reports are received. The number shown under each province indicates the number of marts in that province from which wholesale prices for the article in question are reported.

Name of articles	Burma	Eastern Bengal and Assam	Bengal	United Provinces	Rajputana	Panjab	Balu-chistan	Sind	Bombay	Barar	Central Provinces	Madras	Mysore

Turmeric	4	..	6	3	4	7	2
Urd	6
Wheat	3	3	7	9	2	6	1	2	8	4	4	..	2

The prices are those governing actual wholesale transactions on the last day of each fortnight or the day preceding, and unless wholesale transactions have actually taken place within the fortnight, no prices are quoted. The definition adopted for a "wholesale transaction" is one in which not less than 10 maunds of food-grains, seeds, grass and straw, and one maund of other articles, such as turmeric, tobacco, etc., change hands. In the case of live-stock, prices are quoted for a score of sheep and for a pair of bullocks. The prices are only quoted for those marts where the article in question is a staple of local trade. The total number of articles for which wholesale prices are reported, as given in the list above, is 43, and there are 95 separate marts from which reports are received. Prices for 24 of these articles shewing 67 marts are published in the *Supplement to the Gazette of India* each fortnight. Table No. 23 contains prices for the following 23 articles shewing transactions in 86 separate marts :—

Rice (husked)	Ragi	Poppy seed	Jute
Wheat	Maize	Sesamum (<i>til</i> or <i>junjili</i>)	Tobacco leaf
Flour (wheat)	Gram or Kadalai	Ghi	Turmeric
Barley	Arhar dāl	Sugar, raw (<i>gur</i>)	Sheep
Jawar	Linseed	Sugar, refined	Plough bullocks
Bajra	Mustard and rapeseed	Cotton	

The prices given are the simple average of the half-monthly prices quoted from each reporting district.

Tables Nos. 24 and 25—Wholesale prices of certain staple articles in Calcutta and variations.—A special statement of the prices of certain staple articles in Calcutta was obtained in 1885 in connection with enquiries into the fluctuations in prices. It was incorporated in the tenth issue of Prices and Wages in India in 1893. No change has been made in the form of the table except that the prices of 2nd and 3rd class bricks, which were quoted up to 1901, have been omitted since that year. The sources from which prices for this table are taken, are stated in the note prefixed to the table.

Tables Nos. 26 and 27—Annual average prices per 100 lb paid by the Supply and Transport Corps, Peshawar, Rawalpindi, Lahore, Meerut, and Lucknow Divisions, for articles for consumption by troops and variations.—These statistics were first prepared in 1885 and were incorporated in the tenth issue of the volume of Prices and Wages (1893) together with a table of variations. These tables have continued unaltered up to the present date, but are now confined to the last twenty-five years with the base year 1875-76.

NOTE.—In this table, the variations in the prices of gold (measured in silver) are arrived at by multiplying the price of bar silver in London in 1873 (=59½d.) by 100 and dividing the product by the price of bar silver in the particular year.

Example—

Price of silver in 1890 = 27½d. (table No. 20); price of silver in 1873 = 59½d.; price of gold in 1873 = 100. The variation in the price of gold in 1890 is then worked out thus—

The variations in the prices of the other articles in this table are calculated thus: As the variation in the price of gold in table No. 21 is to the variation in the price of gold in this table, so is the variation in the price of the article in table No. 21 to the variation required.

Example—

Variation in the price of gold in table No. 21 = 100; variation in the price of gold (measured in silver) in 1890, in this table = 215; 100 : 215 :: 86 : 185

(a) Price of 1874 is taken as 100
(b) " " 1878 " " "

PART III

WAGES

NOTE

The statistics of wages presented in table No. 28, and its subsidiary tables Nos. 29 and 30, are compiled from half-yearly returns, received from District officers, purporting to show for each district the average for the preceding six months of the wages per month of certain labourers and artisans. By far the most important class of labour is agricultural, and the record obtained entirely fails to give a reliable indication of the remuneration of the labourers. This result is due to the inherent difficulties of the problem, and the practical impossibility of getting the untrained reporting agency to make the necessary allowances for the varying conditions of employment. Payment in kind is commonly practised, either for the entire wage, or as a supplement to cash wages, and the supplements vary according to the season and the nature of the employment. The regularity of employment also varies greatly, and employment is practically nowhere continuous throughout the year. The most common expedient for avoiding these, and other difficulties, is to return cash wages for labourers employed in towns or their neighbourhood, which are in no way typical of the rates prevailing throughout the district. The same difficulties are also encountered in collecting information as to the wages earned by village artisans, and the results are further vitiated by assuming that masons, carpenters, and blacksmiths necessarily earn the same wages. The wages of horse-keepers are recorded with the least inaccuracy, but even if they are taken as typical of the wages of domestic service generally, the class represented is unimportant.

The selection of the districts, for which figures are published in the tables, is also faulty, as the districts are not typical of tracts having similar economic conditions, but are those originally selected according to their climatic character and rainfall for making returns of the prices of food-grains.

Measures are now being taken to replace the present faulty returns by more scientific methods of investigation, whose object will be to ascertain the standard rates of wages in each district or homogeneous tract, and to observe permanent changes in those standard rates as distinct from short period fluctuations. The most important feature of the new method is a regular wage census to be conducted once in five years, the first of which will be taken in 1911.

Tables Nos. 31 and 32 are the record of wages paid in certain State Railways and Government Establishments as well as in some Industrial Establishments in various parts of the country.

The figures in table No. 31 are reported annually by the Director General of Post Office, the Agent to the East Indian Railway, the Manager of the North Western Railway, the Irrigation Department of the Government of Bengal, the Public Works Department of the Government of the United Provinces and the Accountant General, Military Department; and those in table No. 32 are supplied by the owners or managers of the different industrial concerns.
